Hi people! Welcome to my school! My names is Nikki, this is my pet George and next to me is my school helper SD3337B6-12 but I call him Buzzy.

by Anna Sovova
I ride to school in a special metro which is only for students from my university. It's really cool and pleasant, because there is a coffee maker and a slot machine.

On my school campus, the library is great with electronic books where my best friends forever, Lisa and Lucas, work. They're a little crazy but I'm not worried about it.

This is my room. I must live here because my home is far from the school. And where is my school?

Far far away eastward.

Fail. It's westward.

Ok. I'm sorry professor.

We can't have here any plants and everything green is only scenery. We've got our oxygen in a special bottle which we take every day.

And what happened that we have to have our school on the Moon? We can sell you it, if you want...

Yeah, here we go!

My school is on the Moon hidden in the special trapdoor. In future it's normal but little impractical.
Sweet future

story by Nikki Smith
All began in London 2022...

Two budding scientists, Becky and Marge became friends and started together on an interesting research which had transformed our world for better...

Everything was fine and it looked that girls found a way how to create robot with own intelligence...

It is super! It looks like a repairman!

 LEVEL

I can hear you!

But one day Marge met a boy and she fell in love with him...
She thought that her friend would be happy but she wasn't. Becky was disappointed and left laboratory without a word.

No, please! Don't leave!

Marge was confused and sad so she wanted to end up with their project. But her boyfriend told her that he would help her with completion her robot because one time he worked like a designer.

Marge believed him and gave him the password from the laboratory. But she didn't know what will follow...

I love you, darling. I trust you!

I love you too, kitten...

Her boyfriend lied to her all the time. One night he broke into the lab and he stole the robot.

Your robot is amazing, we will finish it together. We can do it!

Finally she came to a very old home and there she heard creepy laughter...

Becky! Becky! God, where are you, Becky!

I've got fear. What is it?
She entered...and what she saw! There were Becky, her boyfriend and Robot! It was planned! Becky wanted all the success for herself so she planned how she can get rid of her! Marge was funky!

What is it? Bad joke?

Hi Marge! We were waiting for you!

Marge was betrayed. And she swore that her revenge would be sweet...

Little bit sugar... hahaha!

When Becky found out, she wanted to stop her. But it was late. Marge started with by of millenium...

She went to a desert where there was no human and she started with her revenge. She created a new chemical which can destroy all life on the Earth.

Sweet future Becky...
And therefore we must live in space. The end.

O-M-G! I didn't know anything about it! It's so interesting!

Yeah, I know. Will we go on class now?

Yes, of course.
And for that reason we must live on the Moon...

Yes, because she destroyed all water and air on the Earth.

OMG! We must hurry up!

Classroom is there!

Hey! Be careful!

What are you talking about? Do you know, that we are having a class in two minutes?

Yes! We are here on time!

But it was so-so...

Phew, phew...

Good morning class! Today, we are talking about something from history. It's nature. Your school helpers will help you. Let's go!

Drink this information, please.

What?

You, too.

Animate and inanimate nature were different.

Remember !!!

Inanimate nature was composed of eg. from rocks and minerals, air, heat and light, etc.

And now I know everything! "Information drinks" are the best!

Yeah, that's true. I invented it.
So if we wanna know some new information, we can drink special potions and immediately we know everything. But it isn't all, what is divine on our school...

We've got special chips inside our heads on which we can download books from our electronic library. That's great!

I would like to download "Little women" by Louisa May Alcott, please.

And here you can see school factory where our workers make new helpers for us. They do it; like years years ago, Becky with Marge.

In some trapdoors, we have got history scenery from the Earth. If you want, we can look there.

Meow!

It's definitely Yes!

Here is for example Mayan pyramid. We use it for drama club.

But only occasionally!

And this is old castle which our scientists saved from once blue planet. We play battles with swords here. It is so cool!
School canteen is one of older parts of the school. The oldest.

Now is a lunchtime. We go to a school canteen which is outside our school. I'm so hungry...

Meow?

But because we can't have our own food and everybody is hungry, usually we eat everything. (It's so ugly!)

Why me? I don't want diamond!

After destroying The Earth, I could not do anything for people. Only this. I built a school on the Moon for better and healthier studying for our children. I wanted created the entire city for all humanity. But they all can't come in here, on this little satellite.

So other people stay on the dirty Earth and they hope, that somebody from their children will help them...

Meow, MEOW!!!

Help us! Please!
The End...
Or not?
